(a) The question given in the last of the passage :
The population of India is increasing at a very fast rate. (This sudden increase is very alarming and is called 'Population explosion') In a poor country live ours it is very harmful. No doubt we have made great progress in almost all fields of industry, agriculture and trade but still we are unable to eliminate poverty due to multiplication of human population. The progress made in the field of medical science has decreased the death rate. The fear of diseases, epidemics and

(5)

untimely deaths are fast disappearing and the average life of man has increased. It is good but for the progress of the nation we must control one birth rate also. Steps should be taken to control the growth of the population. People should be educated about the methods of family planning and should be made aware of the advantages of small family. The most important task before the nation is to check the increase of the population to raise our standard of life.

1. What is population explosion?
2. Why should we control the birth rate?
3. What should we educate to the people?
4. What is the most important task before the nation?
