

Total No. of Questions : 8]

[Total No. of Printed Pages : 2]

Roll No .....

**MMTP-201**  
**M.E./M.Tech., II Semester**

Examination, December 2017

**Thermal Power Plant Engineering**

*Time : Three Hours*

*Maximum Marks : 70*

**Note :** i) Attempt any five questions.  
ii) All questions carry equal marks.

1. a) Explain the working of a thermal power plant.  
b) Explain the performance curve and flow diagram of a critical power plant.
2. a) What are the different components of a power plant. Explain them.  
b) What are the different types of cooling towers. Explain any one of them.
3. a) Explain the draft in a Chimney. How the draft fans are located.  
b) What are the various control valves and actuators?
4. a) Prepare a heat balance sheet of different items of a thermal power plant.  
b) What are the different instrumentation used in a power plant?

[2]

5. a) What is the optimum thickness of an insulation in a pipe for the power plant.  
b) How does the pipes are selected? Explain pipe flexibility analysis.
6. a) What are the safety and pollution control measures taken in a power plant?  
b) How seismic analysis is done for a power plant?
7. a) Explain closed cycle and open cycle gas turbine of a power plant.  
b) Explain the training procedure for a power plant personal.
8. Write short notes on any three:  
a) Ash handling  
b) Vacuum pumps  
c) Fluidized bed combustion  
d) Feed pumps
